

Happy Cabbage Adventure

Instruction Manual

Controls

a: move left
d: move right
r: activate leaf shield
l: charge/fire laser
space: jump/select

The Basics

Firing the laser: Press and hold the 'l' key on the keyboard to charge your laser. If you successfully charge the laser for 3 seconds, the cabbage will have enough energy to release the laser, decimating all in its path! Fire the laser by releasing the 'l' key after you have successfully charged. If you are damaged during the charging process, you will lose all charge.

Recovery Items: Throughout the course of your adventure, you may see enemies drop leaves and water droplets. These items replenish the health and energy of the cabbage, so make sure to pick them up!
